Asks Probe of CIA

Washington, Jan. 24 (AP) — Sen. Eugene J. McCarthy (D-Minn.), a member of the Foreign Relations Committee, proposed today that a Senate panel look into the Central Intelligence Agency's influence on foreign policy.

"Serious questions about the relationship of the agency to the process of making and directing foreign policy have been raised by the role of the CIA in the Dominican Republic and in Viet Nam," he said as he introduced a resolution for the inquiry.
